

HIGH PITCH RETRO-FIT ROOF SYSTEM

Rib Roof's retro-fit high pitch roofing system is a practical and architecturally enhancing solution for existing, problem roofs. Our system can dramatically increase thermal efficiencies while the high pitch design adds to the visual appeal of any building.

Features:

- The high pitch system utilizes the post and purlin design to maximize steel efficiencies and provide a lightweight framing system over existing roofs.
- Flexible framing designs for single and double slope applications.
- Continuous base supports distribute the new roof loads evenly over existing framing members.
- Does not require the removal of existing roof, saving costly tear-offs and disposal expense.
- Allows normal business to continue uninterrupted during retro-fit construction.
- Additional insulation can be added to increase utility and equipment efficiency.
- Retro-fit roof systems can add value to your building appraisals.
- Can be integrated with Rib Roof® Standing Seam roof panel, featuring a positive internal locking clip to secure panels with no exposed penetrations.
- Coordinate trim with 24 GA gutters, downspouts and barge.
- Galvalume® and pre-painted material warranties are available up to 20 years.

Rib Roof Clip-Interlock System

The Rib Roof Standing Seam Roofing Panels, adaptable to any Rib Roof building system, are secured by the patented "No Holes Bared" clip-interlock system that guarantees no water penetration.
