

The Quick Seam Plus Standing Seam Panel is an economical and ideal roofing system for the residential market. The life cycle costs are much less than that of conventional residential roofing products, thus saving you money in the long run.

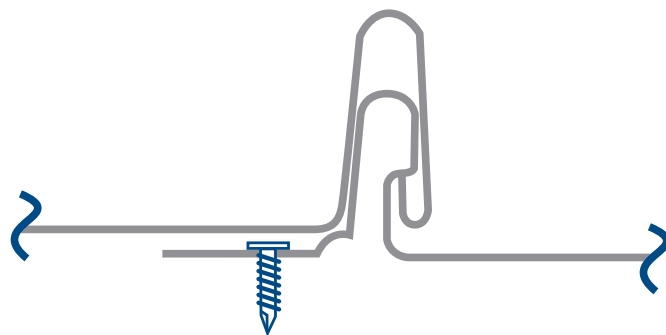

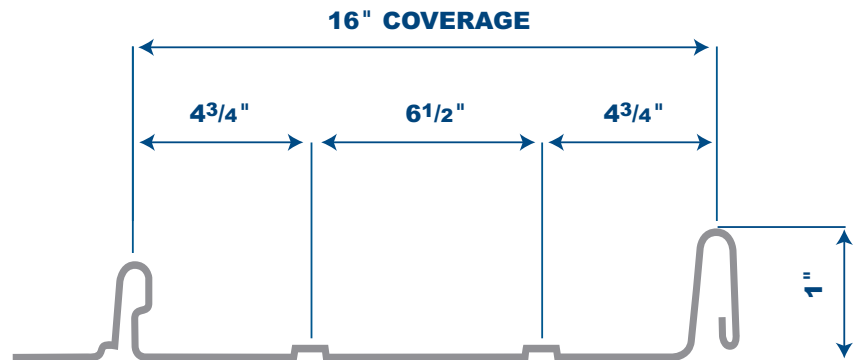

QUICK SEAM *plus*[®]

Features:

- Faster installation due to panel not requiring a clip, thus saving time and money.
- 1" standard rib seam height provides for a clean, eye-pleasing roof system.
- 1.5" high rib seam is available. Please contact your Sales Representative for details.
- 16" wide panel with two stiffening ribs is standard.
- Other panel widths are available. Please contact your Sales Representative for details.
- Designed for slopes as low as 3:12
- Four standard 26 gauge Silicone Modified Polyester (SMP) colors plus Galvalume Plus are available.
- Both Galvalume Plus and SMP finishes are warrantable up to 20 years.
- Preformed standard flashing and matching flat sheets are available.
- The Quick Seam Plus Technical Manual details the standard flashings and installation of the product.

Quick Seam Plus Profile

Typical Panel Lap Detail

QUICK SEAM^{plus}

Note:

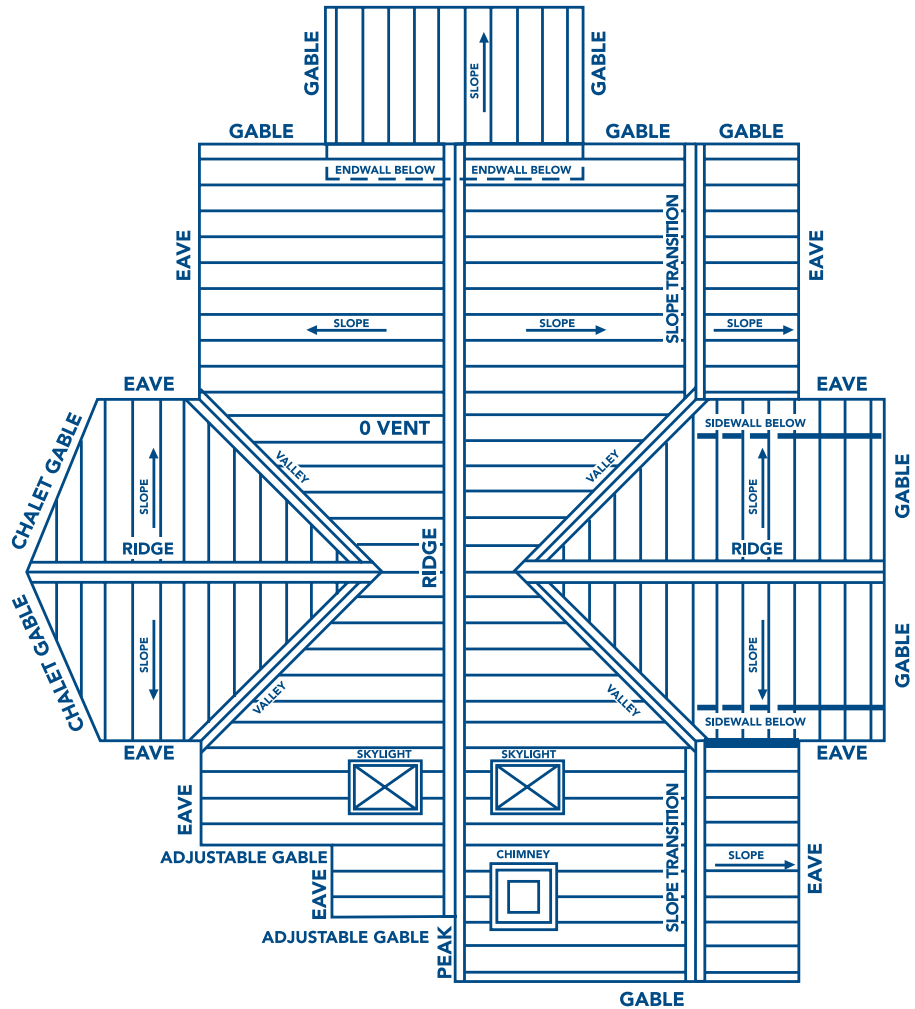

Flat metal surfaces will display waviness commonly referred to as "oil canning." This is caused by steel mill tolerances or subframing alignment and is a characteristic, not a defect of panels manufactured from light gauge metal.

The installation details for these flashings are shown in our Quick Seam Product Information Manual.

Panel Testing:

- UL 580, Class 90 Wind Uplift (Construction Number 587)
- ASTM E 1680 – Air Penetration
- ASTM E 1646 – Water Infiltration
- Texas Windstorm Testing

Specifications are subject to change without notice.

Typical Flashing Locations

Please refer to the Quick Seam Product Information Manual for flashing details and installation instructions.
