

Quick Snap Plus Standing Seam Panels feature architectural panel aesthetics as well as structural panel performance. A concealed fastener clip system has been designed to allow for thermal expansion and contraction while providing superior hold down strength. Quick Snap Plus Panels are ideal for the open web framing or over a solid deck. Use as roofing mansards or for fascia applications.

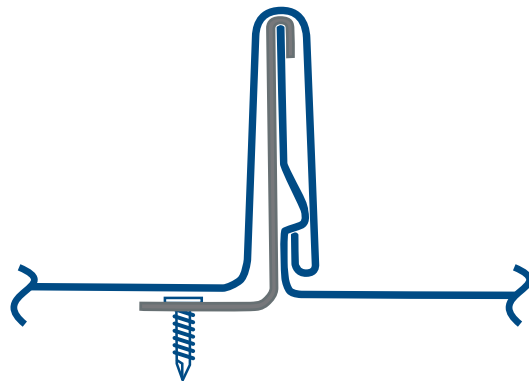

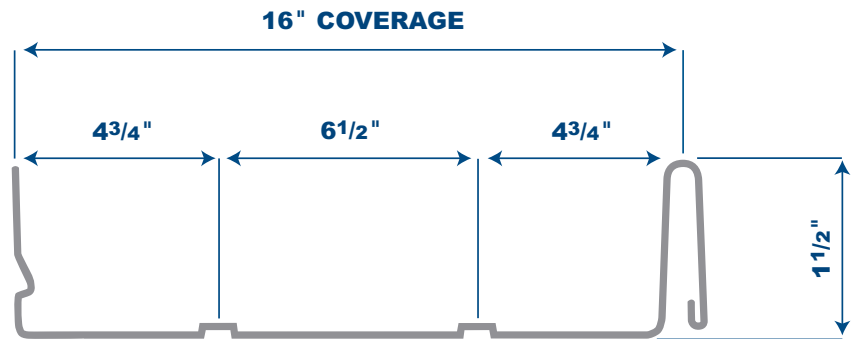

Features:

- Standard Rib height is 1-1/2". 1" Rib height is available, contact your sales representative for details.
- Rib spacing can vary from 10" to 22".
- Panels can be applied over plywood, metal deck, open framing or rigid insulation in conjunction with bearing points.
- Continuous interlock rib fastening.
- Stiffener beads available.
- Designed for slopes as low as 3:12.
- Panel finishes are available in Silicon Modified Polyester (SMP) as standard. Kynar (PVF₂) is available, contact your sales representative for details. Both finishes are warrantable for up to 20 years.
- Preformed standard or custom flashings and matching flat sheets are available.
- The Quick Snap Plus Technical Manual details the standard flashings and installation of the product.

Quick Snap Plus Profile

Typical Panel Lap Detail

QUICK SNAP^{plus}

Note:

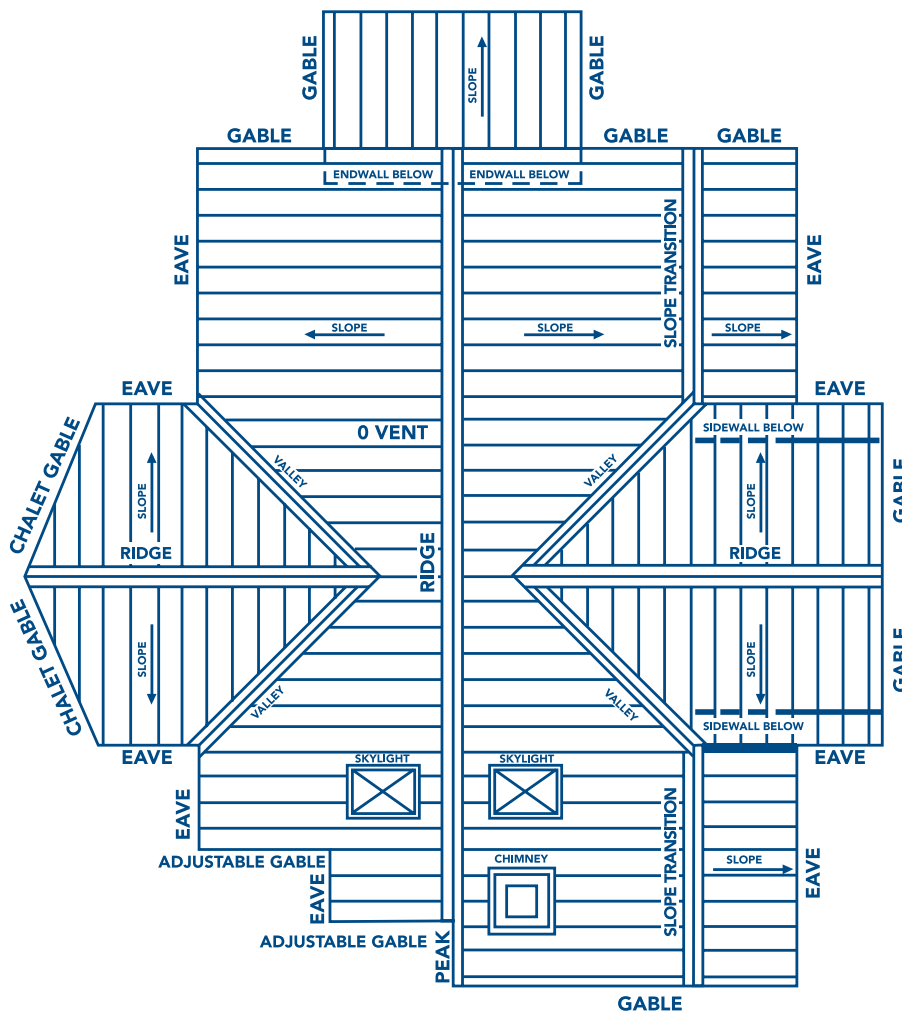

Flat metal surfaces will display waviness commonly referred to as "oil canning." This is caused by steel mill tolerances or subframing alignment and is a characteristic, not a defect of panels manufactured from light gauge metal.

The installation details for these flashings are shown in our Quick Snap Product Information Manual.

Panel Testing:

- UL 580, Class 90 Wind Uplift (Construction Number 588)
- ASTM E 1680 – Air Penetration
- ASTM E 1646 – Water Infiltration
- Texas Windstorm Testing

Specifications are subject to change without notice.

Typical Flashing Locations
